Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 69-73 rejected under 35 U.S.C. 102(b) as being anticipated by Chan (6,193,724).

With respect to claim 69, Chan (as understood) discloses a method of mapping a surface contour of an articular surface comprising establishing a working axis, as best seen at 105, extending from the articular surface; providing a first probe (300) having a first diameter, as best seen in FIG.15, measuring a first distance between at least a first point of the articular surface and a first plane substantially normal to the working axis at a distance substantially equal to the first distance of the first probe from the working axis, as best seen in Fig.15, providing a second probe (300) having a second diameter; as best seen in FIG.18, measuring a second distance between at least a second point of the articular surface and a second plane substantially normal to the working axis at a distance substantially equal to the second diameter of the second probe from the working axis; as best seen in Fig.18.

With respect to claim 70-7, Chan discloses all, the limitations, as set forth in column 6, lines 22-30, lines 64-67.

Response to Amendment

Applicant's arguments with respect to claims 69-73 have been considered but are moot in view of the new ground(s) of rejection. In addition, applicant needs to cancel the non-elected claims.
